Comment for planning application WSCC/045/20

Application number	WSCC/045/20
Name	Amanda Acland
Address	Western Cottage Combe St Nicholas
Type of Comment	Objection
Comments	Councillors, I urge you not to allow Angus Energy manipulate you into doubting the damage that fossil fuels are doing to the Earths climate and environment. Surely David Attenborough's "Extinction: The Facts" programme, shown recently on the BBC, made it crystal clear that we are heading for a catastrophe which requires a complete rethink of our attitude to nature and a how we produce and consume energy. Fossil fuels are not part of a green economy because of the greenhouse gases that they emit on burning; moreover the earth already has more fossil fuel reserves than can be safely used. Fossil fuel exploration is indefensible and you should deny Angus Energy any opportunity to continue drilling works at Balcombe. This is your opportunity to show imagination, integrity and compassion for all children and future generations. This proposed development is not and never will be in the public interest of the people of Balcombe or the people of Britain.
