Comments	I object in the strongest possible terms to this proposed development on many grounds. Firstly, we are in a climate crisis and need to be making a rapid shift to green energy Second, the site is within an area designated as one of Outstanding Natural Beauty and we have a moral duty to future generations to give the fullest protection to such areas. Thirdly there is much concern that underground contamination is possible. I also understand that the site is near a school where increased traffic poses potential harm to children It is incumbent on all of us to ensure that destructive practices that are a threat to the natural environment are banned. The only reason this project is proposed is for commercial gain. We must not allow our precious and limited natural spaces to be degraded and indeed must do the opposite by strengthening our commitment to be guardians of the land and hand it on unscathed.
