Objection

I strongly object to any further exploration at this site. 1) as a parent of two small children I'm very worried about having so many heavy goods vehicles passing the school on a daily basis . The pavements are narrow and we only have a lolly pop lady 2/3 days per week . 2) the pollution and fumes from these vehicles will drop down to the school playground which is lower than the road . 3) it's an AONB area , surely this protection was put in place to protect this area from exactly this sort of thing . Don't we have a duty to preserve this unique place for future generations ? 4) the government has recognised were in a climate crisis - this moves us in the opposite direction . We have legally binding commitments to the Paris agreement and must reduce carbon production not increase it 5) fracking has been banned in many counties around the world with health concerns being raised as key motivations for these bans 6) we have a moral obligation to do what we can to reduce global warming and not damage our planet for our children and our children's children . 7) this activity is unlikely to create jobs or significant revenue for the local area or mid Sussex 8). There is still a need for oil for now but this can be sourced from much bigger , much more efficient oil sources that are already operational for example rigs in the North Sea Please object this application for the sake of our countryside , our planet and our children
