Type of Comment	<input type="text" value="Objection"/>
Comments	<input type="text" value="It should not be necessary to say that we need more sustainable energy sources that protect the environment and it is certainly not suitable in an AONB. The very idea being considered here is an indication that the interests of businesses and money making is being put before the health and welfare of people. You have a responsibility to local people to protect their health and their environment for now and for future generations. Please do not approve this application."/>
