| Type of<br>Comment | Objection  |
| Comments           | I wish to express my opposition to renewed drilling, even if only investigative, for fracking in Balcombe. Fracking has proven to be very detrimental for the environment (drilling for underground gas when we should concentrate on carbon-neutral energy), for the immediate surrounding (noise and pollution from huge lorries), for air and water quality (pollution from lorries and hydraulic fracking disturbing the water level and quality). Both local authorities and WSCC have opposed the previous attempts to frack in this area, and so did local residents in Balcombe and further afield. Please respect their wishes. |
