Comment for planning application WSCC/045/20

Application number	WSCC/045/20
Name	Sarah Sawyer
Address	HILLYFIELD, 15, HILLYFIELD, LEWES, BN7 1LA
Type of Comment	Objection
Comments	I object in the strongest possible terms. There is no good reason to support this application, which prioritises the profits of large companies over the welfare of other people, both present and future, and over the welfare of the environment. I have concerns about the effect in the people living locally, given that large HGV vehicles will be driving through the village right next to the school, and that the proposed flare will inevitably pollute the air by drifting over the village. I have more general concerns about the effect on the local environment, including earth tremors and pollution to water supplies and hence to wildlife. It should surely be clear by now that there is a connection between our environment and our health, both mental and physical. This is not the time to set a precedent for more use of fossil fuels. Climate change is one of the greatest risks we face, and this goes against the attempt to meet our climate change targets. Please, I urge you to reject this application.
