Comment for planning application wSCC/045/20	
Application number	WSCC/045/20
Name	Anne Visscher
Address	THE STABLE FLAT, BALCOMBE HOUSE, HAYWARDS HEATH, RH17 6PB
Type of Comment	Objection
Comments	I object to this application based on several (health) risks associated with the proposed activities that involve the quality of air and water in the local environment, such as the risk of groundwater contamination, pollution of the local reservoir and air quality (due to flaring). In general, extracting every last drop/air pocket of fossil fuels is not in line with sustainable energy approaches in the context of climate change. In addition, the natural environment is under threat worldwide and therefore these activities are especially not suitable in an AONB. Finally, research has shown that people within 12 m of a road suffer significant health effects, and with the local Balcombe school being right next to the road, the increasing number of HGVs passing the school will have detrimental effects on the childrens' health, in addition to carrying safety risks.
