

Comment for planning application WSCC/045/20

Application number	<input type="text" value="WSCC/045/20"/>
Name	<input type="text" value="Georgia betts"/>
Address	<input type="text" value="BLACKTHORN, STOCKCROFT ROAD, STOCKCROFT ROAD, HAYWARDS HEATH, RH17 6LN"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<input type="text" value="The exploration or testing for gas/oil flies in the face of all current research into climate change, as well as the Government's aims and legal targets for reducing our dependency on fossil fuels. My son is asthmatic and attends Balcombe Primary School and I'm very worried about the pollution and fumes from increased HGV movements past the school. Industifying our countryside, in our AONB, is not the way forward, we should be promoting and investing in renewable energy and protecting our countryside, villages and childrens' futures. I object to this application on multiple fronts - I hate the idea of the flare giving off god-knows-what into our local atsmosphere, I object to the noise produced on the site disrupting local residents and wildlife, I object to the idea that Angus' application will create jobs, they won't be for local people and due to the efficiency of mechanisation, they won't offer employment for a lot of people. I object to the possible risk of continuation to our groundwater, the environment around the site and the risk of HGV accidents carrying supplies to the site, or products away from the site. Balcombe stands united against Angus' application and our voices SHOULD be heard - we DO count."/>
