Comment for planning application WSCC/045/20	
Application number	WSCC/045/20
Name	Edward Pack
Address	Pearments, Mill Lane, Balcombe
Type of Comment	Objection
Comments	My concern is the impact of the industrailisation of this site just immediately outside Balcombe and most significantly within the AONB, an area adjacent to the South Downs National Park. It is detremental to the AONB and the setting of the National Park and offers no enhancment to the area. It is a form of development which completely alien to this countryside and will only contribute to the destruction of the peace and safety of this community. It is well know that oil/gas wells release Methane which is an 80 times larger contributer greenhouse gas than CO2 which will also have an immediate affect upon the health of the local community and wildlife at a time when it is also dealing with the stress and health complications of the Covid-19 pandemic. The first responsibility of local government is to protect the people. This application is completely inappropriate for the AONB, the setting of the neighbouring National Park and the econmic, welfare, safety and health of the local community of Balcombe and as such it should be refused.
