Comment for planning application WSCC/045/20

Application Winnumber	/SCC/045/20
Name Lo	orraine Inglis
Address 28	3 Michelbourne Close Burgess Hill West Sussex RH15 9QX
Type of O Comment	Dbjection
ref de cir su the ou of Pla NC tha so be ch tes flu op Co	strongly object to Angus Energy's resubmitted application at Balcombe. Your planners correctly ifused their last application on these grounds: "- The proposed development would represent major evelopment in the High Weald Area of Outstanding Natural Beauty, for which there are no exceptional rcumstances, and which is not in the public interest There are alternative sources of hydrocarbon upply, both indigenous and imported, to meet the national need, there would be minimal benefit to be local economy from the development, and there is scope for meeting the need in some other way, utside of nationally designated landscapes It would therefore be contrary to Policies M7a and M13 is the West Sussex Joint Local Minerals Plan (2018) and paragraphs 170 and 1720f the National anning Policy Framework (2019)." Nothing has changed other than a shorter time period. This is still OT in the public interest. Also of a major concern is the research of the independent hydrology report that was carried out by Tapajs Limited which found that the oil well cement casing was 'poor' and not bound in all sections. This poses risks of pollution and of leaked water migrating in unexpected ways eccuse of the naturally faulted geology. The risks of contamination of the water supply from an acid, hemical or oil spillage, however small, are completely unacceptable! The last time Angus carried out that had remained in the well but did not substantiate this claim. They are not to be trusted to be trusted to be trusted to be trusted to be trusted to be trusted to be trusted to be trusted to be the site. It was proved at Brockham that they drilled without permission from Surrey County boundi which meant their admission to the AIM market was based on lies. This application must be fused.
