Comn	nent for planning application WSCC/045/20
Application number	WSCC/045/20
Name	Karin Schulte
Address	HONEYCHURCH, STOCKCROFT ROAD, STOCKCROFT ROAD, HAYWARDS HEATH, RH17 6LH
Type of Comment	Objection
Comments	I am objecting to the application for an extended well test at the Balcombe Site by Angus Energy. I object on environmental grounds, the potential for groundwater contamination and seismic risks are too high. Flaring will release pollutants in a residential area, just at time when air quality needs to be maintained. I question the financials of Angus Energy, will Angus put aside enough money to cover the risks? Have the risks and the financial size of the risks been calculated by WSCC? Has WSCC requested Angus to put money aside to cover risk costs - not that any clean up has to be paid out of public money. Has WSCC seen the insurance coverage that Angus has taken out - can that insurance coverage be made public. WSCC needs to ensure that it will not take a budget hit if things go wrong. Angus is a private company for profit. Where is the benefit for WSCC and the local community. At this time I don't see how WSCC can approve this application on any grounds. I object to this application.
