Dear Sir / Madam

As a resident of Balcombe, I wish to register my **objection** to the above planning application.

HGV Traffic

The volume of HGV traffic that will go through the village will significantly increase traffic on the London Road, pose a major risk to the children attending Balcombe Primary School. The road through is not designed to deal with the volume and size of these vehicles, this will pose a danger to other users on the road.

In addition the increased traffic will significantly increase pollution and result in a deterioration of the area quality, affecting the lives of many people in the village.

Air Quality

The air quality will be dramatically reduced for all the people living near the site as a result of renewed activity on the site. The proposed flaring will spread pollutants across the village. There are numerous studies which show the impact this has on the quality of life of people exposed to these pollutants. Given the current Covid-19 crisis and the risks the disease poses to anyone with underlying conditions. Increased pollution will result in an increase in Respiratory Illness, a major risk factor for Covid-19,

Seismic Risk

A number of other development sites have experienced seismic events, causing significant disruption to the local communities

Economic Benefit

There is no economic benefit from this activity, only significant risks to the lives and well being of the people in the village.

I therefore urge you to object this application.

regards

Paul Dinneen
