Dear Mr Sierakowski,

Thank you for your letter of 10th November advising me of Planning Application WSCC/052/20 and your offer to answer any queries.

The description of the Proposal in the letter mentions traffic signals and signalised pedestrian crossings but these do not seem to appear on the Design Drawings in Appendix 3.1 of the Application. Nor have I been able to find reference to them in the Road Safety Audit (Appendix E) or the Transport Assessment (Appendix 8). Please will you advise me where I can find details of traffic signals and signalised pedestrian crossings in the Planning Application.

At the same time please will you let me know whether the Realigned A29 when completed will provide the trunk road linking Bognor with the Fontwell Roundabout on the A27 or whether the existing A29 will remain the trunk route.

Many thanks in advance,

Richard Blott
