Comments	This proposed carriageway will not protect all road users and does not fulfil local requirements. It fails to justify the effect that the vast proposed developments in the area with the extra traffic that they will bring, congestion, air pollution, noise pollution to name but a few. The plans don't appear to consider adequate road safety for all users of all needs. The risk of flooding in an already at risk area is of grave concern. Local wildlife doesn't appear to be adequately protected in this scheme and not enough space would be conserved for the needs of residents nor the wildlife.
