Comment for planning application WSCC/052/20

Application number	WSCC/052/20
Name	Mrs Lynne Sharrock
Address	CHANTRY MEAD, 3, CHANTRY MEAD, BOGNOR REGIS, PO22 0DE
Type of Comment	Objection
Comments	We agreed to buy this property after viewing it in July this year. We were told about the possible impending new road by the Estate Agent (Cubitt & West in Arundel) at the time. However, although they told us about the 30 mile an hour carriageway and noise barrier they did not inform us of a 2.5 m wide central island, controlled pedestrian crossing, traffic signals, bus stops, other crossings and THE CONSTRUCTION OF A SUBSTATION BULLDING which in particular worries us. We understood that the noise barrier would be of a certain height which would shield our view and the noise from the carriageway and there would be significant landscaping which would possibly camouflage it from our view. We still would, however have to contend with constant traffic noise in what is at the moment a pleasant, quiet environment. Another concern is this: If there are crossings used by pedestrians where would they cross from and to? Does this mean there might be footpaths alongside our back garden fence? Chantry Mead is a private road as you will be aware and therefore there should be no public access or thoroughfare unless it is to visit or reside in one of the properties here. Where is the substation going to be built? I sincerely hope that it is not going to be close to my property in any way. This could be a health hazard of radiation as well as giving off constant sounds like buzzing etc. I totally object to having an electrical substation so close to my property and being exposed to the sound and the possible bad effects it can have on our health. Another concern is the destruction of many natural habitats within this 1.3km distance. Not just the road itself, but during the length of time it is going to take to construct. There is going to be a churning up of fields and trees and total destruction of many wild life habitats as well as a considerable amount of noise during the construction process. Finally, I am very concerned about the security of my property during the construction of the road, as workmen will constantly have
