

Comment for planning application WSCC/052/20

Application number	WSCC/052/20
Name	Linda Wale
Address	CHANTRY MEAD, 7, CHANTRY MEAD, BOGNOR REGIS, PO22 0DE
Type of Comment	Objection
Comments	<p>I object most strongly to this road and future developments being constructed for all the reasons that I gave in my first objection. Now after gaining more insight into the appalling way WSCC have misled the public and residents I feel compelled to add more. In the application primary description there is no mention of the road being raised! In the planning statement this description is repeated again without mention of the road being raised, however in 4.4.6 it states that the majority of the carriageway will be built on an embankment within areas of high groundwater levels which is virtually all the area to the west of Chantry Mead and Murrell gardens thus posing more possibilities of flooding when we already have problems with 'standing water'. Because of the raised carriageway this must mean therefore that the noise mitigation barrier will be higher and be completely visible to all the residents of CM and MG giving us an outlook something similar to a prison wall!! WSCC have ignored any requirements that are stated in DRMB and the protection of interests and communities has been dismissed. We have been ignored. .</p>
