CIRCULAR TECHNOLOGY PARK

ENVIRONMENTAL
STATEMENT

VOLUME 1 OF 3

MARCH 2021

FORD ENERGY RECOVERY FACILITY AND WASTE SORTING AND TRANSFER FACILITY, FORD CIRCULAR TECHNOLOGY PARK

Figure list

Non-technical summary (NTS)

Volume 1

1	Introduction
2	Site description
3	Proposed development
4	Alternatives
5	Environmental issues and methodology
6	Air quality, odour and dust
7	Climate change
8	Health
9	Community and social effects
10	Cultural heritage
11	Ground conditions and the water environment
Volume 2	
12	Landscape and visual effects pt1
Volume 3	
12	Landscape and visual effects pt2
13	Natural heritage
14	Noise and vibration
15	Traffic and transport
16	Summary tables
	Glossary

Technical appendices (bound separately)

- A EIA scoping
- B Competent experts involved in the preparation of the ES
- C Air quality, odour and dust
- D Carbon assessment
- E Human health risk assessment
- F Cultural heritage
- G Ground conditions and the water environment
- H Landscape and visual effects
- I Natural heritage
- J Noise and vibration
- K Traffic and transport
- L Outline construction environment management plan

Printed using Evolution Business Pre-print paper which is produced from 100% recovered fibre certified to FSC® standards, using 100% recycled post consumer waste. Manufactured without chlorine bleaching. High whiteness is achieved thanks to a special converting process for the recycled fibre. Except over A3 sized printing on Canon LFM054 Red Label, PEFC certified paper. A donation has been made to the Woodland Trust in support of its Carbon Capture Scheme to help offset carbon dioxide emissions through the planting of more trees.

Bound in Polyvinyl Chloride (PVC) ringbinders. Manufactured by Nunet with flexible, stationery grade PVC which is fully recyclable and therefore considered as 'closed loop' - it can be re-used many times. The ringbinder design includes reusable cover and spine pockets.
