Comments	<input type="text" value="Object to this new plan, for the same reasons at the last. Air quality is affected at the moment with the new builds being put in, so concrete crushing and waste management would make the air quality even worse than it already is. There is also only one main road in and out of Yapton which is already too small for the traffic that uses it. Noise and traffic pollution will be even worse with more lorries and articulated vehicles using it."/>
