Objection

I wholehartedly object to this application for the following reasons The proposal is wholly unsuitable for the area which is surrounded by urbaniation with more homes due to be built including the development of Ford airfield which would border this incinerator. The government is committed to improving air quality and protecting the hedgerows and wildlife, as is the whole world, this is in complete opposition to this. There would be further increases in pollution from lorries 24 hours a day 7 days a week, due to the increase in large scale housing the air quality has already been affected and can only see this escalating. These incinerators should be placed in an area which has low housing and low environmental impact not in a densely populated environment. There is also a huge impact on noise disturbance from the A259 which will increase immensely, it is already in constant use and thus incinwould only impact greatly on this. This council us committed to large scale housing developments but should consider the impact on the health and wellbeing of inhabitants should an incinerator be built so close.
