Comments	<input type="text" value="This is the wrong place for a development of this kind. There are plans in the immediate area for future housing of 1000 plus properties. There are existing properties all around this site who would be affected by noise, pollution and traffic. The surrounding roads are not fit to cope with the amount of heavy vehicles that it would bring and and the by products would affect the air quality adversely for the surrounding area. The health and safety of the population should be the priority in the case of this development."/>
