Objection

I am objecting to the proposal on several grounds. 1. Traffic will be increased massively in the roads surrounding the area. Yapton/Ford is already facing huge amounts of increased traffic due to all the new housing developments in the area. The roads will be less safe with extra large numbers of industrial vehicles constantly travelling to and from the recycling unit, on country roads not designed for continuous industrial traffic. 2. Pollution in the area will increase significantly with this installation, Yapton already has more than it's fair share of industrial units with environmentally damaging businesses....the concrete recycling business releasing concrete dust is already noticeable and is itself too near residential properties. The new unit will be discharging toxic fumes and stench into the air very close to residential areas. Indeed there is a new estate planned extremely close to where the unit is being planned. 3. Arundel is tourist town of great value to the area. Thousands travel to it regularly because it is an unspoilt area, an example of Old England. That chimney stack will be visible from Aundel. As will the toxic waste/smoke which the prevailing wind will carry over Arundel, complete with accompanying stench, almost continuously. This will undoubtedly spoil and damage the tourist industry in the area, which will directly impact on many many livelihoods in the area.
