Objection

I wish to object to the approval of this proposal for the following reasons: 1. The building with still be substantially higher by several stories than the vast majority of the surrounding villages and other buildings. Having seen the expected views of the plant which have been circulated by the proposer, the building (with its 85m high chimney) will blight the landscape for miles around and will be clearly visually from the surrounding coastline and the SouthDowns National Park, substantially affecting the natural beauty and landscape of the area. 2. The fumes which will be emitted from the plant will disperse across a wide area, especially with a prevailing wind, affecting a large number of the surrounding villages. There are plans submitted to build 1500 new homes as well as at least one new school on and near Ford airfield and this will be even closer to the site than the current settlements. Children in particular should not have to be so near to the noise and air pollution produced by this proposed plant. 3. The roads surrounding the site are already overused and under maintained and the increase in traffic this proposal would cause is not sustainable in the long run, both in number and size of vehicles, as well as the pollution this would bring. I strongly ask that you reject this proposal and any further attempts to place a plant of this nature on or near this site.
