Objection

Firstly, the consultation period is very short, not giving much time for people to comment. My objections are as follows: 1. Traffic - we already have major traffic problems on our local roads with the existing and new developments plus all the industrial businesses nearby. The proposal will only make things worse. 2. Chimneys - the height of one was objected to previously, and now you propose two of the same height. 3. The effect on housing and the new school - this is too close to existing housing, will not be sufficiently hidden and likely be producing harmful products. The new housing and proposed new secondary school will be right next door to the incinerator which is irresponsible. 4. Tourism - the views from the downs, Arundel and the surrounding area will be spoilt by this building and can only have a negative effect our our tourism. 5. Yapton, Ford and Clymping are villages not industrial sites - we have had the concrete crushing plant recently forced upon us, along with noxious smells from the waste treatment plant. We do not need anything else! 6. Horsham - I understand that an incinerator has been approved for Horsham, so why build another one here?
