Comment for planning application WSCC/011/21	
Application number	WSCC/011/21
Name	Paul Lightfoot
Address	Church Road, Yapton BN18 0EW
Type of Comment	Objection
Comments	Objection. Reasons: There will be a detrimental effect on local listed buildings and conservation areas. The appearance of the incinerator is not in keeping with the local landscape due to its size and position and will be visible not only from lower ground levels but also from view points along the South Downs. At night, the stack/top of the incinerator will be lit up causing light pollution. There are properties in Arundel and other areas close the the planned incinerator site that sit at a height higher than the stack where hazardous and harmful pollutants will be more evident. The fine partials that will be emitted are proven to cause adverse health affects (cardiovascular/cancers/COPD). Credibility of the continuous monitoring of emissions from the stack are questionable - a full analysis of particle size distribution radiating from the stack to determine the ratio of fine to coarse particles will prove the scale of impact to human health and in most cases emissions of concern, such as dioxins, are only monitored a few

times a year. Smell/odours off-site from the incinerator especially during warmer months will be

Received

15/04/2021 22:43:12

evident as waste will arrive and be stored on site.
