Objection

I would like to object in the strongest terms of the lack of suitable of this project for the area. * it is an enormous building overlooking local housing and the whole area - it will almost certainly impact on light to local buildings * this proposal is just outside of the South Downs National park and will have a terrible effect on the area * Until built we have no real knowledge of what dust/odour/fumes may be produced - both from the facility itself and the number of vehicles going to it * How many trees/hedgerows are to be removed as a result of the construction? * The buildings are unattractive and will be a blot on the horizon in an area of beauty * This facility will by necessity for it to be viable generate an enormous increase in traffic in a area where the roads are already to capacity - this will obviously impact on highway safety. * It is obvious a building of this size will impact Impact on the local natural environment including animals and their habitat * With a increase in vehicle movements there will also be a marked increase in local noise and disturbance to residents * a building of this size and nature can only effect the local landscape and skyline negatively.
