Comment for planning application wSCC/011/21	
Application number	WSCC/011/21
Name	Will
Address	Hanover house Hook Norton
Type of Comment	Objection
Comments	Firstly, the withdraw of the initial scheme and its subsequent replacement by this very similar scheme, should not diminish the level of objection. This new scheme is so similar that objections to both should be considered alongside each other. This new scheme is still inappropriate for a rural setting within site of a national park. The levels of traffic created will overwhelm the local road infrastructure. The scale and especially height of the proposed building are too dominant a feature for the local coastal plain landscape. The risk of pollution in the heavily populated local areas is too high.
