Comn	nent for planning application WSCC/011/21
Application number	WSCC/011/21
Name	Samantha Tilbury
Address	COURTLANDS WAY, 7, COURTLANDS WAY, BOGNOR REGIS, PO22 6AW
Type of Comment	Objection
Comments	I strongly object to this proposed development. I lived in Basingstoke for over 15 years, we had both an incinerator and anaerobic digester, both of which we were assured there would have no environmental or infrastructure impact. We frequently had disgusting smells coming from each of them, thousands of residents having to complain and constantly being told they were "monitoring the situation". Also we were told there would be no noticeable change to lorry traffic in the area we lived, it went up exponentially the moment the anaerobic digester opened, all day, every day, again residents

complained and just told it would be monitored but nothing was improved. It's one of the main reasons we moved away from the area as it impacted our daily lives. We didn't move to a beautiful part of West Sussex for the landscape to be scarred with a horrific 70m tall chimney. This road is already

unsuitable for HGV traffic, I drive down it often and there are lots of HGV's using it, due to their width they take up more than half of the thinner roads around here meaning oncoming traffic often has to drive along the verges. Received
