Type of Comment	Objection
Comments	How many more times must we say to our Councillors -do your job - refuse permissions for this Application -it hasn't changed, it has increased now higher and 2 chimneys . You are ignoring the fact that all local roads are too narrow for size and quantities of waste delivery vehicles which we will have to endure. both during construction of the facility and thereafter. I estimate that if a delivery truck is 7m in length and Grundon's one way estimate of 60 trucks to site each day - set end to end they would take up nearly 1 mile. This does not allow for other vehicles requiring access to the site or the waste lorries exiting the area. Fumes from chimney will spread over too vast area and there is still the hidden costs to NHS/ Hospitals to treat lung problems etc caused by the fall out, which has yet to be determined. The height building itself has also increased in this new application plus the addition of a 2nd chimney - all hardly an incentive for tourism -spoiling the view from Arundel and across the coastal plain from the National Park. There is still a complete disregard for the local area already overcrowded with new housing and not taking into account housing and schools planned to be built within meters of the boundary to the incinerator.
