Comments	There seems little change from before this, is a monster development in an area that already has more than its fair share of waste sites. The road network can not manage, the roads through villages, laid down (the basic layout) hundreds of years ago is not suitable. The fumes, fire risk, (we have had several fires at TJ Waste) and other health and safety issues are a concern. If you are going to build 1500 (we hope not) they will be very close to this, the current new homes have not sold in Yapton, so not sure if you will sell these ones next to a waste plant. Not what I would chose. PLEASE LEAVE US ALONE and stop this continuous development and STOP creating environment impacts that are irreversible.
