Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	Sylvia Belcher
Address	SUMMERHILL DRIVE, 11, SUMMERHILL DRIVE, BOGNOR REGIS, PO22 6AJ
Type of Comment	Objection
Comments	Objection based on previous comments, July 2020, still stands. When research shows carbon emissions (CO2) from incineration have now overtaken those from coal, and will become the dirtiest form of electricity production in the U.K. It is predicted that by 2035 incineration will become a more carbon intensive process than even landfill. Sheer madness!
