This is a rural area with nature that should not be disturbed by such a destructive suitability of use for the area. For many there may be Loss of light/outlook/privacy.

Effect on conservation areas, flora and fauna need to be nurtured and protected, the negative effect of the pollution could be devastating. Slow worms are protected and in danger and many live in the area. The dust and fumes would be detrimental to the health of men women and children, many of whom in the area are elderly or have breathing issues like me and moved from London to this rural sea area for the health benefits of cleaner air! Pollution kills. Especially for young people like me.

*~~~ Dust/odour/fumes likely damaging to lungs and likely our wildlife. Being close to the sea the pollution likely being blown to us and other nearby villages. Just shouldn't be allowed.

Impact on trees/hedgerows would be tragic, all local ones would be susceptible to negative effects of pollution and are supposed to be protected by law!

◻◆◻ ◻◆◻◻◻◻ ◻◻m◻ ◆~x~ ◆x●● •m m Traffic increase, this facility will
increase it more so making more noise and pollution to effect the lungs and flora and fauna. Small
villages are no place for large volumes of traffic its not safe for our children

Especially as the facility will mean many large industrial vehicles coming and going on our tiny roads.

Impact on natural environment including animals and their habitat will be undeniably negative too and they need to be protected. Pollution and noise effect on wildlife in our beautiful rural area will be devastating.

Noise and disturbance for locals as well as wildlife, this facility in every way does not fit in with the surroundings they intend to place it in.

*~~~ Effect on landscape or character of area will be negative and irreversible. We are proud of our rural area and moved here for the landscape and character, we must not make it just another industrial site. Please help us fight this. I know many feel the same and don't know a single person who wants this pollution spewing eye sore of a monstrosity here damaging our flora and wildlife and our health. Please stop this for their sakes and for our children's sake. Their young lungs are not made to inhale fumes of any sort toxic or not.

I pray our council and deciding bodies see sense and fight tooth and nail to protect us from this.

Kind regards.

Mrs J Corkill
