Subject: Application WSCC/011/21
Date: 17 April 2021 12:52:01

Sirs,

I would like to lodge my objection to the revised planning application regarding the proposed Ford Energy from Waste plant at Ford Road, Arundel, BN18 0XL.

My objections are made on the following bases:

- a. The amount of additional traffic generated in the local environment along secondary roads likely to affect local traffic and cyclists etc.
- b. The amount of additional traffic generated in the local area along primary routes such as the A259 likely to significantly affect holiday traffic.
- c. The likelihood of toxic or other noxious fumes being created where aged people many with breathing problems have chosen to reside.
- d. The lack of information regarding the likely sources and travel miles of the waste materials concerned.
- e. The lack of information regarding the nature, routing and impact of power lines, transformer stations etc in the local area.
- f. The lack of information regarding how waste heat recovery will be applied/provided to local businesses/communities.

Kind regards

Warren John
