Type of Comment	Objection
Comments	Over the past few years this once pleasant place to live has been completely ruined by over-development leading to flooding, heavy traffic due to lack of infrastructure and now pollution both from this monstrosity and the proposed crematorium which will also be spewing noxious fumes into the atmosphere. This building will be too close to residential areas including the proposed Ford Airfield development, traffic will be untenable on our country roads and there will be an adverse affect on health. Holidaymakers looking for fresh air will not be choosing to stay here if this eyesore is allowed to go ahead which will have a huge negative impact on the local economy
