Comments	Once again this area has been earmarked to house a facility which will detract on the quality of life of local residents. We have uilding of new houses going on virtually everywhere without the infrastructure to accommodate the new residents let alone us already living here. This proposal will bring a level of traffic both in quantity and vehicle size which our roads will be unable to accommodate. The impact on wildlife and the local environment will be catastrophic. This is supposed to be a village. Construction of this type should be built in an industrial environment away from people and the countryside. The noise, disturbance, dust fumes etc are going to impact immensely on residents lives and will presumably affect the value of property within the area. We do not want this type of development within this area.
