Comment for planning application WSCC/011/21	
Application number	WSCC/011/21
Name	Gillian Mirza
Address	SOUTHDOWN HOUSE, FORD LANE, FORD LANE, ARUNDEL, BN18 0DE
Type of Comment	Objection
Comments	I'd like to object to this proposal for the following reasons: It is unsuitable for this largely rural area. The building, although reduced in size from the original proposal, is still completely out of scale with other buildings in the area. The illustrations which accompany the proposal intend to deceive by placing the whitish building against a whitish sky, much reducing the contrast which would be seen on days with different weather. There are a number of historic and listed buildings close to the site, including the beautiful and ancient Ford Church, which will be negatively impacted by the development. This area is very rich in native wildlife, including threatened bird species such as Lapwing. Cetti's Warbler have also recently come to the area, and a Cirl Bunting, rarely seen outside Devon was spotted only last weekend. It can't be known how such a development will impact wildlife, except that it is most likely to be negative. Wetland areas were proposed as part of the new housing development, the proposed buildings will impact on the amenity value of these sites.
