Dear Sir,

Planning ref NSCC/011/21.

I write to object to the planning application referred above for an incinerator chimney at Ford Industrial Estate.

I object on the grounds of increased air pollution which will inevitably occur in the Arundel area. Air quality is already poor in Arundel on frequent occasions, such that it is preferable to stay indoors. The prevailing wind is from the South, which would bring fumes from the incinerator over Arundel, seriously reducing the quality of life in this historic town, and damaging health.

Please consider this grounds for rejecting the application.

Yours sincerely

C PERCEVAL
