Cc: [Parish Clerk \(Ford\)](#)
Subject: Objection to application WSCC/011/21
Date: 28 April 2021 14:17:07

Dear Sir

I would like to register my objection to the proposed Ford Energy Waste Site, on several points. This area is just not suitable for an industrial building of its' size, stature & nature.

1. This site will bring so many additional emissions into the surrounding area where you have already proposed and agreed to new housing. Think of all these people & young children that will be affected. Who knows what health dangers these emissions could cause them in the future. Our government are meant to be stopping all these various noxious gases and yet here's a proposal to dump them in our atmosphere.
2. The additional traffic generated will cause yet more damage to our pot holed roads along with the dangers of large lorries having to access the site via narrow country lanes which many of the local people cycle on.
3. We are right on the South Downs National Park and the effect on the local landscape and impact on wildlife will be considerable should this application be allowed.
4. How much water will this site require to run? For an area that is almost like a desert, with water in short supply, has this factor been considered?
5. Who benefits with the profit? Not the local people!

Yours sincerely
Mrs Jacqui Hutton
