Dear Sir

With regard to the above planning application for the Ford Circular Technology Park Ford Road Ford Arundel BN18 0XL.

I wish to say I am totally opposed to this development for the following reasons

- 1, This is a coastal area which is important to the environment and wild life, and also subject to climate change flooding.
- 2, Traffic on the A259 the is already heavy and access from the local villages increasingly difficult. More heavy lorries, which have no alternate routes in or out of the site, is going to exasperate the problem for local residents.
- 3, The emissions from the chimney can never be completely free from polluting fumes , and the wind off the sea will send them inland to effect the air quality to the local villages.
- 4, The height of the chimney will be an eyesore and blot on the landscape visible for miles around.
- 5, Although we have a small plant on the site at present it does not form a prominent feature on the surrounding area, but the proposed development will even at a reduced height dominate and totally effect the character of the landscape and lives of residents in the area.

Yours sincerely

Mrs L. Collis
