Comments	The height and overall scale of this proposal is far too big. It will be obtrusive in the landscape. The number of large lorries carrying waste to the facility will have a large impact on already heavily congested roads, destruction of the road surface and additional pollution from the extra vehicles will have a detrimental effect on air quality. A massive incinerator will also have a detrimental effect on air quality, as a severe asthma sufferers I have grave concerns over this proposal. It is unsuitable for the area on all of the above counts and should be rejected.
