Application number	WSCC/011/21
Name	Susan Barnes
Address	BONHAMS FARM, MAIN ROAD, MAIN ROAD, ARUNDEL, BN18 0DX
Type of Comment	Objection
Comments	I strongly object on a number of points; 1. This type of waste incinerator is now banned in other European countries as it emits more co2 than other methods. Why should we accept this here as the technology has already overtaken it? 2. The proposed incinerator is huge and will be seen for Mike's around and be an eyesore. 3. The incinerator site is too close to housing and for safety reasons this is unacceptable. 4. No new roads are planned to cope with the 240 huge lorries per week that are planned. Our roads cannot cope with the existing traffic. 5. Air pollution should be checked now, during building, following the completion of building, and daily as incineration takes place. Who will ensure this happens to keep us safe. 6. Noise is emitted from the plant and from the increased lorry traffic. Who will monitor this. 7. This waste incinerator is not best in class and has a life of 25 years. Proposing something that is already out-dated, in terms of carbon capture, and is potentially harmful to all local residents, would seem to be dangerous, leaving WSCC completely open to litigation. Stop this abomination now! 2.
