| Comments           | I strongly onject to this application. 1. Road infrastructure and impact to local vicinity is not sufficient. 2. Pollution and Risk to health. As a sufferer of asthma and heart failure I must object to any form of pollutant to health. This monstrosity will severely impact on many with health issues. This should be built it where impact to the health, wellbeing and environment is not going to impact on thousands of people. Any councillor supporting this should be ashamed. |
