Comn	nent for planning application WSCC/011/21
Application number	WSCC/011/21
Name	Simon Wolf
Address	2 ATHERINGTON COTTAGES, CLIMPING STREET, CLIMPING STREET, LITTLEHAMPTON, BN17 5RN
Type of Comment	Objection
Comments	I am strenuously objecting this the application! How can the idea of continuing to allow Viridor and other massive trucks along our small village streets here in Climping make any sense. The roads are not suited in every way, not wide enough, unsafe for these large lorries to pass cyclists, its only a matter of time and someone will be killed. The roads are in awful condition as they are as small village roads they are not designed for these immensely heavy and wide vehicles! Then the plant itself which is a failed process of burning rubbish including our recycling in a bid to create power, this is completely illogical. "Lets burn stuff to create energy, have we not learnt that burning is the complete opposite to what we should be doing to reduce carbon footprint. Climping is a small picturesque village and to place a building larger and taller than Battersea power station is ridiculous. Why don't we just start mining for coal as well. Completely and utterly dumb and it must not be allowed!
