| Comments | 1) Proximity to existing and proposed residential housing : the facility will be located next to a proposed very large housing development in Ford and Climping 2) Visual impact of the buildings and chimneys: this will dominate the view of the Whole area of the south downs national park 3) Traffic Impact : 240 lorries minimum per day all from outside the west Sussex area 4) Road access: Narrow,single carriage way- this additional traffic will create new safety and environmental hazards 5) Emissions: the incineration process will produce noxious and hazardous emissions and is now considered the dirtiest way of creating energy 6) This proposed facility is total in the wrong place and needs to be moved out of sussex |
