Comn	nent for planning application WSCC/011/21
Application number	WSCC/011/21
Name	David Foy
Address	Rowan Cottage, Grevatts Lane West, Bilsham
Type of Comment	Objection
Comments	I wish to object to the application for the following reasons; 1) The size of the building on a comparatively flat site will be a complete eyesore and totally visible from all points of the surrounding area. 2) There will be a continuing outflow of noise, odour, fumes and extract materials from the building, which will detract from the generally rural nature of the current area. 3) Traffic flow on an already busy road will be noticeably increased, with large vehicles causing further congestion and traffic problems to a comparatively secondary road. Traffic accidents will inevitably be the result. 4) The prevailing winds will carry the outfall materials from the chimney and buildings generally directly onto the surrounding farmland, trees and hedgerows, and into the River Arun, causing pollution problems to the general landscaping, agriculture activities and river life, both fish and crustaceans. The farmland could well become unusable for crop production, causing hardship to those farming the land, and bird and animal life in the path of the pollutant outfall materials could well be severely damaged. 5) The building size itself is too imposing in an area of generally low-level domestic, retail and industrial buildings.
