

# Comment for planning application WSCC/011/21

Application number

WSCC/011/21

Name

david hall

Address

CHURCH LANE, 252, CHURCH LANE, LITTLEHAMPTON, BN17 7QJ

Type of Comment

Objection

Comments

I strongly object to this revised planning application as I did for the original scheme. There have been minor alterations which in no way mitigate the horrendous effect that this proposal will have on the local environment. Movement of heavy vehicles will be increased substantially on roads that are already congested at peak times. Housing both existing and future proposed will be effected by this commercial traffic and its pollution. It will be inevitable that the chemical, gas and dust emissions from the plant chimney will effect those living in the immediate area as well as down-wind. We are only just realising the long term effects of air pollution from such industrial plants on growing families. A building of such dimensions will inevitably become a gross eye-sore on an area of tourism and recreation and no amount of tree planting can off-set this detrimental effect. Grundon/Viridor should be more pro-active in recycling waste rather than burning thousands of tonnes as all households have been encourages to do. The case for the need for such a disposal plant in West Sussex has not been shown to be necessary and it should be rejected before the local environment is blighted for years to come.
