| Comments | I object to the revised plans for the incinerator at Ford. I believe this will impact the local community both physically in terms of additional pollution from the vehicles going to the facility and from the incinerator itself and also mentally having to live with such an over-bearing structure and the worry of what effects it might be having on health. Therefore on grounds of mental and physical health, I object. Furthermore, the impacts of this facility will be far-reaching across Sussex with vehicles travelling all over the county to reach the facility. Sussex roads are already heavily congested. It seems to me burning waste, which has travelled via lorry is not a "green" solution at all. |
