Type of Comment	Objection
Comments	The visual impact of the incinerator will affect views within the South Downs National Park. There is no need for more incinerators in this area- as West Sussex already has enough sites. Incineration is not green energy - it harms air quality and is therefore a risk to human health and wildlife. It will also have a negative impact on climate change. The local roads cannot cope with the size and weight of the HGV movements being proposed.
