

Comment for planning application WSCC/011/21

Application number	<input type="text" value="WSCC/011/21"/>
Name	<input type="text" value="Sarah-Jane Deadman"/>
Address	<input type="text" value="ST. ANDREWS CLOSE, 10, ST. ANDREWS CLOSE, CHICHESTER, PO20 2DN"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<input type="text" value="Incineration stops the circular economy and reduces recycling rates in order to achieve their ongoing viability. WSCC already has enough permitted incineration sites to meet its needs. Moving bio waste to Anerobic digestion and having a more resilient recycling process is key. The other issue is how much CO2 they produce. For 1 Mkw of electricity produced from incineration it produces more than twice the CO2 than, 1 Mkw of Electricity generated from Coal."/>
