1. This is not a suitable area for the disposal of waste using an incinerator because: a. It is too close to dwellings housing people and animals b. As it stands now, we are downwind of the rubbish disposed of there and in the Summer, the odour is worse due to the heat. Sometimes we can't open our windows because you feel like vomiting! c. Despite care taken( I'm reassured) rubbish is blown off the lorries as they pass and the surrounding fields are littered with unspeakable waste. d. We are living in an area of some incredible species of birds and the fumes that will be pushed up into the air will undoubtedly affect them. e. Unless you actually live here, you cannot imagine the impact of traffic we already have in the Ford road and the one leading up to the airfield. Three times a week when the car boot is on, we have be known to be gridlocked for nearly 2 hours. Those of us living In Rodney Crescent have been unable to get out to work. f. The carbon monoxide build up has caused us to have to close our windows yet again. g. You will be taking away the only leisure we have here to walk as we are not an actual village and there are no other facilities to enjoy. h. Sometimes the noise of the build up of traffic causes us to close our windows for a third time. Also, the ground shakes when the huge lorries go by!! Seriously is this acceptable? i. Due to this proposal and like that of others in the past, our houses have lost a lot of value and this can be substantiated by asking local estate agents, who say " what van you expect when you live near a waste site " Altogether, I am totally against this proposal and if it goes ahead I shall, like many others of us be looking for compensation. I.
