Commi	ient for planning application wsec/011/21
Application number	WSCC/011/21
Name	Christina Cockett
Address	ALDWICK PLACE, 4, ALDWICK PLACE, BOGNOR REGIS, PO21 4AD
Type of Comment	Objection
Comments	Objection on the grounds of the negative environmental impact of this development - increase in traffic on already congested roads, the pollution and contamination from burning waste, impact on climate change by inefficiently burning what can be recycled. The hugeness of the plant will impact negatively on the countryside, wildlife being sited on one of the last gaps between the urban developments Littlehampton and Bognor Regis. Compared to recycling waste this development will offers fewer jobs and it is a backward step in dealing with waste within a climate emergency situation. This will have a negative impact on our local economies, on public health, the climate and the environment. Instead we need to implement zero waste systems to reduce, reuse and recycle.
